PROFESSIONAL SUMMARY

Full-Stack Developer focused on React, TypeScript, ASP.NET Core and Spring Boot, delivering web applications from requirements and architecture through deployment and maintenance. Experience spans REST APIs, database design, authentication, third-party integrations and reusable interfaces. Independently develops software products, with particular attention to maintainable code, access controls and reliable data workflows. Complements hands-on engineering with 19+ years in programming education, technical mentoring and code review.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML5, CSS3, responsive design.

Backend: C#, ASP.NET Core, Java, Spring Boot, Node.js, REST APIs.

Data & persistence: SQL, PostgreSQL, SQL Server, MySQL, Firebase, EF Core, JPA/Hibernate.

Architecture: SOLID, design patterns, dependency injection, Clean Architecture, authentication and authorization.

Delivery & quality: Git, GitHub, Docker, CI/CD, unit and integration testing, code review, technical documentation.

PROFESSIONAL EXPERIENCE

Independent Full-Stack Developer

Freelance / Independent Software Projects · Jul 2023 – Present

- Design, implement and deploy web applications, connecting React interfaces to backend APIs and persistent data; take products from requirements and MVP scope through release and maintenance.
- Build Alex Lessons API workflows with input validation, token verification and role-based access checks; separate UI components, API handlers and data services.
- Implement offline material access and queued answer synchronization, with per-user storage and server-side checks to prevent duplicate or stale assessment submissions.
- Maintain Git-based releases, environment configuration and automated tests; resolve authentication, navigation and data-saving failures across devices.

Leading Programming Instructor & Technical Mentor

IT STEP Academy · Odesa, Ukraine / Remote · Sep 2007 – Present

- Teach object-oriented programming, algorithms, data structures, SQL, design patterns and SOLID; connect C++, C#, Java, Python and JavaScript concepts to working applications.
- Create course materials, review code and supervise capstone projects; guide architecture, task decomposition, Git workflows and technical presentations using Scrum-based project work.
- Build ASP.NET Core and Spring Boot teaching examples demonstrating dependency injection, ORM persistence and separation of domain, service and data-access concerns.

Technical Project Consultant

GastroLab · May 2017 – Dec 2017

- Provided architecture advice and code reviews for web and mobile solutions, refining API design and recommending improvements to maintainability and software quality.

SELECTED PROJECTS

Private E-commerce & Order Management Platform

Full-Stack Web Application · Private project; source code not publicly available

- Contributed to the development of a private e-commerce and order-management web application.

Alex Lessons — Learning Platform

React · TypeScript · Node.js serverless functions · Firebase · Vercel
alex-lessons.me

- Build and maintain an educational product combining structured lessons, reusable interactive exercises, assessments, progress tracking and separate student/instructor interfaces.
- Integrate Firebase authentication and database persistence with server-side authorization and assessment APIs; implement certificates and instructor feedback workflows.
- Add service-worker caching and an IndexedDB synchronization queue so previously opened materials remain accessible during connectivity interruptions.

Java Backend & Microservices

Java · Spring Boot · JPA/Hibernate · MySQL · RabbitMQ · Educational demonstrations
spring_microservice1 · spring_microservice2 · hibernate

- Implement controllers, application services and JPA repositories for profile/student CRUD, with dependency injection and relational persistence.
- Connect two Spring Boot services through RabbitMQ: publish feedback as JSON and consume messages in a separate service; demonstrate asynchronous communication.

Published Android Applications

Kotlin / Java, Android SDK · 5+ published apps, including Voice Recorder, QR Code Reader and Munchkin Level Counter. Munchkin’s public Google Play listing shows 5K+ downloads.

Google Play developer portfolio · Munchkin Level Counter

EDUCATION

Programming / Professional Software Development Training

IT STEP Academy · Odesa, Ukraine · 2005–2010

Bachelor’s Degree in Economics

Open International University of Human Development “Ukraine” · Mykolaiv, Ukraine · 2005–2010

LANGUAGES

English (B2) · French (A2) · Ukrainian (Native) · Russian (C2).

CEFR levels are self-assessed.

CERTIFICATIONS

Verified digital credentials: skills validation and completed technical courses.

Back-End Development · IBM SkillsBuild · Oct 2026 · Advanced skills validation

Front-End Web Development · IBM SkillsBuild · Oct 2026 · Advanced skills validation

Data Analysis Using Python · IBM · Oct 2026 · Intermediate course

JavaScript Essentials 2 · Cisco · Jun 2025 · Intermediate course
